EXPERIENCE AND EDUCATION BACKGROUND

Freelancing — *Software developer*

JAN 2017 –

- I have worked as a freelancer since 2017 on php and laravel mainly and started 2018 when I started working on node js, react, vue and sometimes python Django.
- Developed an application using React with Redux with node js or with laravel architecture from scratch.
- Developed applications with laravel mainly real estate, ecommerce and dispatch system.
- Developed an application using Vue and laravel architecture from scratch.
- Developed an application using laravel and vanilla js architecture from scratch.
- Good knowledge in Responsive Web Design(RWD) using Bootstrap 3/4, CSS3 media queries, SCSS, SASS.
- Experience in developing Graphic User Interface (GUI) to display business data using jQuery with Cross-browser compatibility and Web application scaling.

- Working knowledge of Web protocols and standards (HTTP HTML5/XHTML/, CSS3, Web Forms, XML, XML parsers).
- Proficient in making AJAX calls using jQuery and usage of JSON for faster and more impulsive responses.
- Good Experience of using the various JavaScript concepts like Prototypes, Closures, and Object-oriented features, Promises, Observables.
- On compatibility issues with different versions of browsers.

Andela, Kigali — *trainee Software developer*

AUG 2019 - JULY 2020

- I worked at andela as a trainer full stack software developer.
- I had to join andela to gain hands-on professionalism from professionals and work on big projects with a lot of people.
- I was working on Javascript(nodejs) and react for front on most of the projects
- I was building apis with node js, react designs, and building apps with react and redux, ensuring security to all apps I was working on with the team
- My expertise was in building Analysis and debugging, applications Design, Development, Integration, Maintenance, Installation, Testing of various client/server as per Enterprise standards.
- Used Bitbucket as code repository and GIT for version control.
- Worked in Agile Methodology having daily sprints and attended daily scrum calls with onshore and offshore teams.

Junior Software(intern) at hepta analytics— *Software developer*

April 2020 - july 2020

- I started working as an apprentice at Hepta building big projects in a team.
- Worked in a team for software (Mahewa) to count how many times a song is being played over Kenyan radio station.
- Tech stack used: React,react-redux, javascript.
- During my stay in Hepta I got lucky to develop a website from scratch personally with laravel and react on front-end
